PROFESSIONAL SUMMARY

Node.js Developer with proven experience in building scalable server-side applications and RESTful APIs. Proficient in JavaScript ecosystem with expertise in MongoDB and API development. Demonstrated strong ability to deliver complex projects independently and as part of engineering teams.

TECHNICAL SKILLS

- Core Technologies: JavaScript, Node.js, Express.js
- Database: MongoDB, Mongoose ODM
- API Development: REST, JWT Authentication, express-JWT
- Development Tools: Git, VS Code, Postman
- Best Practices: MVC Architecture, API Security, Code Documentation

PROFESSIONAL EXPERIENCE

Backend Developer Intern | The Curve Africa by Kora

Lagos, Nigeria (Sept 2023 - Mar 2024)

- Architected and implemented RESTful APIs supporting concurrent users for web and mobile applications
- Developed secure authentication systems using JWT and implemented role-based access control
- Optimized MongoDB queries resulting in 40% faster data retrieval times
- Collaborated with cross-functional teams to integrate backend services with frontend components
- Implemented comprehensive API testing strategies using Postman automation

KEY PROJECTS

FOOD HUB - Restaurant Order Management System

- Built scalable backend architecture using Node.js and Express.js
- Designed secure payment integration and user authentication system
- GitHub: github.com/jerrysHacktive/foodHub

VAZZLES E-SHOP - E-Commerce Platform

- Developed complete backend infrastructure handling product listings
- Designed a secure authentication system using express - JWT
- Designed and tested APIs with Postman to handle user authentication, CRUD operations, and file uploads.
- Implemented robust order management and payment processing systems
- Optimized database queries reducing response time by 50%
- GitHub: github.com/jerrysHacktive/vazzles-E-shop

CERTIFICATIONS & ACHIEVEMENTS

- Backend Developer Certification - The Curve Africa by Kora (2024)
- Node.js Complete Development Course - Jonas Schmedtmann (Udemy)
- Led backend development for hotel management system in 5-person engineering team
- Independently architected and deployed full e-commerce backend system

CORE COMPETENCIES

- API Design & Development
- Database Optimization
- System Architecture
- Problem Solving
- Team Collaboration
- Strong work ethic with the ability to balance academic and professional commitments effectively.
- Eager to learn and adapt to new technologies in dynamic environments.
